

Nonlinear Science Letters D

Volume 2

2011

CONTENTS

China's Silk: From Charles Darwin's Natural Selection to Ying-Xing Song's Human Selection Ji-Huan He-----	1-2
A Short Remark on Thermal Therapy Ji-Huan He-----	3-6
Simple Derivation of the $2/3$ Scaling Law for Plants Ji-Huan He-----	7-9
Application of the Correlation Dimension in Ecology Yu-Zhi Wang, Bo Li, Ren-Qing Wang, Jing Su, Xiao-Xia Rong-----	11-14
Attractor of Semilinear Parabolic Systems in Unbounded Domains Bo Sun, Hongfang Xiao-----	15-20
Numerical Solutions of Multi-point BVPs for Optical Bridge Design Fazhan Geng-----	21-24
Explicit Solution for Bimolecular Reactions , Part 1: The Variational Approach Ji-Huan He-----	25-28
Explicit Solution for Bimolecular Reactions, Part 2: The Homotopy Perturbation Method Ji-Huan He-----	29-32
Fabrication of PVP/ PVA Nanofibers for Biomedical Applications Chao Feng, Fujuan Liu -----	33-36
Electrospinning PVP Nanofibers using Aqueous Solvent Lu-feng Mo, Yang-Shuai Liu-----	37-40
Electrospinning of Polyvinyl Pyrrolidone with a Traditional Chinese Drug Liang Wang, Lan Xu-----	41-44
Fabrication of Nanoporous Microspheres via Electrospinning Poly(Butylenes Succinate-co-butylene Terephthalate)(PBST) Loaded with a Traditional Chinese Drug Liang Wang, Lan Xu, Fujuan Liu -----	45-48
A new experimental setup for bubble electrospinning Naeem Faraz, J. H. He, Lan Xu-----	49-50
A new experimental setup for bubble electrospinning with a thermal supplier Naeem Faraz, J. H. He, Lan Xu-----	51-52
Analytical Solutions of nano boundary layer past stretching surfaces by using He's Homotopy Perturbation Method M.Taeibi-Rahni, D.D.Ganji, M.Khaki-----	53-56

Unsteady Flow Simulation in Rotating Machinery by Detached Eddy Simulation Yu-Lin Wu, Shu-Hong Liu, De-Min Liu, Xiao-Jing Wu-----	57-60
Radial outflow between two parallel disk fed by symmetric entrance holes M.Hosseini, D. D. Ganji, S.M.Moghimi-----	61-64
Application of Homotopy Perturbation Method to Solve Steady Flow of a Walter's B' fluid in a Vertical channel in Porous Media E. Ghazvini, D. D. Ganji, Z. Z. Ganji-----	65-69
Application of VIM to solving viscous flow in a channel with weak permeability G.H. Montazeri, Z. Z. Ganji, D. D. Ganji-----	71-76
Application of VIM to solving steady flow of a Walter's B' fluid in a vertical channel with porous wall F. N. Lavasani, H. Domiri Ganji, D. D. Ganji, Z. Z. Ganji-----	77-81
HPM Based Simulation of Poisson-Boltzmann Equation with Small Zeta Potential D. D. Ganji, Mofid Gorji-bandpy, Mehdi Mostofi, P.Jalili-----	83-86
Periodicity for strongly nonlinear bifurcation system of muscular blood vessel Hong Yao, Tao Deng, Guang-jun Zhang-----	87-93
A Proposed Adaptive Inertia Weight Strategy in Particle Swarm Optimization Cui Li, Hua-Jie Zhang, Chen Xu, Guo Li-----	95-102
Motion of a Spherical Solid Particle in Plane Couette Fluid Flow M. Jalaal, E. Ghasemi, D. D. Ganji, H. Bararnia, Soheil Soleimani-----	103-106
Analytical Approach to study a pendulum as a Nonlinear Oscillator M. G. Nejad, D. D. Ganji, M. Motevalli, et al. -----	107-110
Analytical Solution of Non-Linear Mass-Spring Oscillator M. G. Nejad, D.D. Ganji, M. Motevalli, S.ghafoori, et al.-----	111-114
Homotopy Perturbation and Variational Iteration Methods for Time-Dependent Descending of Spherical and non-Spherical Objects P. Jalili, M. Jalaal, D.D. Ganji, A. Janalizadeh, B. Jalili-----	115-118
Mutual interaction of the electric field in multi-bubble electrospinning Wan Shou, Liang Dong, Yong Liu, Rui Wang-----	119-121
Application of the Differential Transformation and the Modified Homotopy Perturbation Method to Duffing Oscillator D.D.Ganji, Y. Rostamiyan, A. Fereidoon, H.Yaghoobi, M.R.Davoudabadi-----	123-129
Entropy transfer of the filed and the atom in the nonlinear Jaynes-Cummings model X.Q. Yan, H.C. Cui-----	131-136
Silk Fibroin Nanofibers for Tissue Engineering Applications via Bubble Electrospinning Fujuan Liu-----	137-140
